Biometric Security and Convenience

Military, financial organizations keep data portable and protected

Montreal, Quebec - February 19, 2004 - Memory Experts International (MXI) has launched ClipDrive Bio, a secure USB 2.0 data storage device. Mobile workers can carry between 64MB and 2GB of data on a key ring device, secured by fingerprint recognition and a partitioned drive.

MXI, a leading provider of secure, portable data storage devices, partnered with AuthenTec for the biometric access control. All data written to the secure partition is encrypted with 128-bit AES, and all biometric and password files are retained on the device.

"The ClipDrive range of products is designed to empower mobile users with both data security and convenience," said Lawrence Reusing, VP corporate development and R&D at MXI. "We have seen an explosion in demand for a USB flash drive that offers both portable storage and security. Government organizations and companies that have to comply with data privacy regulations can rely on ClipDrive Bio, which will only allow access with an authorized fingerprint."

"We've designed this to be the ultimate tool for secure, portable data storage, from the ruggedized plastic, down to the single-part casing and the curved edges of the design," said Mike Kieran, director of sales and marketing at MXI "Power users can get up to 2GB of data, with transfer rates of 8MB per second, in a thumb sized footprint that weighs less than an ounce."

Administrative functions allow organizations the flexibility to re-size both secure and public partitions, add and remove users and control read or read / write access by user.

About Memory Experts International

Memory Experts International is a world class, multinational manufacturer of highly secure, portable data storage media devices, biometric based system access controls, hard drive subsystems, memory modules and cabling technologies for the computer and office equipment markets. With over 10 years of experience in delivering quality products, MXI combines vast industry knowledge with unbeatable time to market to meet the ever changing and complex needs of their customers. <http://www.memoryexpertsinc.com/>
